Risk Management Education for Today's Farm and Ranch Women

Annie's Project is a multi-day series that focuses on women involved in agriculture. They learn about their evolving business and sharing life experiences with other women living and working in the same complex and dynamic environment.

ANNIE'S PROJECT
EMPOWERING WOMEN IN AGRICULTURE

Who is Annie?

Annie grew up in a small farming community and married a farmer. She spent her lifetime learning how to be an involved business partner with her husband. Together they accomplished great things, but it wasn't easy.

What will you learn?

Information and practice in critical decision-making on:

- Production, marketing, financial, legal and human resource risk
- USDA programs
- Insurance coverage
- Family communication

Participants will receive a portfolio with many resources to take home and use for their operation.

Objectives

Annie's Project is a comprehensive educational program and support network designed to:

- Deliver technical training to farm and ranch women, enhancing their business skills
- Develop a support network, which is essential for continuing education and self-help
- Create a comfortable and supportive learning environment

What have women done since participating in Annie's Project?

"Taken what I have learned and using it to review what we have in place for insurance, long-term plans, goals and deciding what changes need to be made."

"My husband and I put a business plan together to buy more cows and took it to the banker. The banker felt it was very well put together and said to move forward."

"We closely manage our financial situation; we do several balance sheets per year and have communication with our ag banker."

Sessions

Family and You

- Introduction to course
- Family communication and goals
- Mission and vision statements

Women's Health and Money

- Caregiving for rural families
- Mental health and wellbeing
